

ONE SOLUTION FOR ALL YOUR FASTENER NEEDS

**DOMESTICALLY MANUFACTURED
OR GLOBALLY SOURCED**

LEGACY

Since 1927, Decker has built a reputation for delivering superior products and exceptional performance. We specialize in processing, coating/plating, stocking and shipping fasteners to meet your specific needs.

Serving markets throughout the country and around the world, Decker adheres to national and international standards. Our experience enables us to be multi-faceted, serving numerous industries including automotive, structural, and agriculture.

DOMESTIC

Decker's domestic manufacturing capabilities allow for a wide range of cold-headed products, including nuts in sizes M6 to M24 and non-threaded solid step rivets. With over 50 cold-forming machines and advanced tapping and thread rolling equipment, we create parts to meet your exact specifications.

With over 50 cold-forming machines, Decker's domestic manufacturing facility can produce components ranging in size from 1/4" through 1" finished hex nuts, 3/8" through 1" DH hex, tower, culvert, and guardrail nuts, all with state-of-the-art internal tapping machines that allow for precise threading, to meet your exact specifications.

GLOBAL

Decker's global sourcing capabilities provide high-quality cold-formed products. We ensure quality through strict inspection processes and compliance with international standards. Our efficient logistics and strategic partnerships enable reliable, on-time delivery.

MISSION To be the industry leader in fastener solutions at competitive pricing, while fostering sustainable growth, exceptional quality, and lasting value for our customers, employees, and stakeholders.

COMMITMENT

Decker is committed to the needs of our customers, employees, and stakeholders, ensuring that each group receives equal importance and attention.

Customers: We are dedicated to delivering high-quality parts and services on time, while maintaining competitive prices in the fastener marketplace. The goal is ZERO DEFECT products through our continuous improvement efforts and customer satisfaction initiatives.

Employees: We are committed to maintaining a safe working environment that provides the resources, education, and training necessary to deliver unmatched quality and service in all areas of the company.

Stakeholders: We are responsible for upholding financial integrity and creating growth opportunities, while maintaining the highest quality and sustainable standards.

HEX

FLANGE

SQUARE

ROUND

WELD FASTENERS

Decker is a leading supplier of weld nuts to domestic and international auto makers.

Our extensive collection includes hex, square, flange and round weld nuts manufactured to rigid OEM standards. Our weld fasteners are developed from low-carbon steel or to your specifications. Protective thread masking and prevailing torque features are available on most of our weld products.

With an extensive, ready-for-shipment inventory and prompt delivery, we help you maintain your fastener supply, avoiding costly downtime.

With Decker, your production welding requirements can always be met.

NUT/WASHER ASSEMBLIES, WHEEL NUTS

For agriculture, passenger car, and truck assembly applications, Decker's variety of wheel and assembly fasteners will meet your requirements every time.

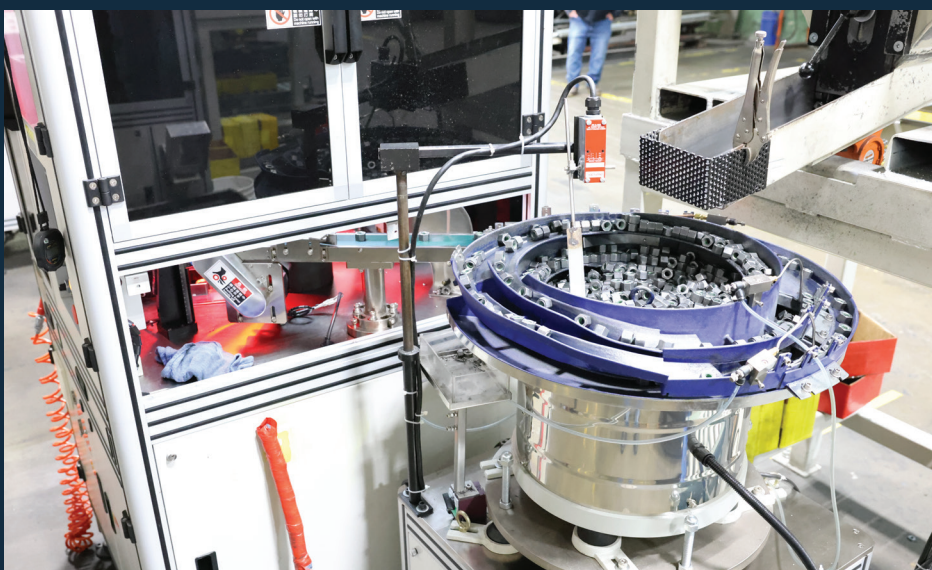

Free spinning nuts are available in a variety of styles: hex, flange, jam and conical nut/washer assemblies, plus special engineered internally threaded products. We can apply any plating or coating to your specifications.

LOCK NUTS, FLANGE NUTS

There's more than one reason Decker is a leading supplier to automotive, transportation and other industries.

Our locknuts are made to ASTM, IFI, DIN, SAE and automotive industry prevailing torque specifications, available in low-carbon (Grade A, B and F/Class 8 and 9) and in medium carbon (Grade C and G/Class 10).

Manufactured and sourced through our dedicated and advanced quality product planning process.

STRUCTURAL FASTENERS

For the most demanding structural needs, you can rely on Decker, known for exceptional performance and superior products 100% made in USA.

Decker supplies domestic applications for highway, bridge and building construction. These include a full range of hex, tower, guard rail and culvert nuts. All are available in a plain finish or with a variety of plating including hot dipped galvanized, mechanical galvanized and zinc.

100% MADE IN THE USA

SPECIAL FASTENERS

Decker's unparalleled range of cold formed configurations include crucial fasteners such as spacers, special-use fasteners, pins, and rivets. You can be confident in applications such as automotive door hinges and body frame assemblies, or in using our spacers in safety critical attachments such as seat belt anchors.

Our diverse products for special production needs include weld pads, thick spacers and step bushings. Headed fasteners include single and multiple solid step rivets and special solid long pins.

All our products benefit from coating, plating and heat treating options that are environmentally safe, including hexavalent-free chrome plating.

PIPE PLUGS AND DRAIN PLUGS

Decker plugs provide the high level of performance required by the plumbing, powertrain, transmission, chassis and marine industries. Our products include hex or square socket and hex or square head configurations available in both drain and pipe styles. Hex flange drain plugs are also available for fluid applications such as rear end differentials, oil pans, and transmissions.

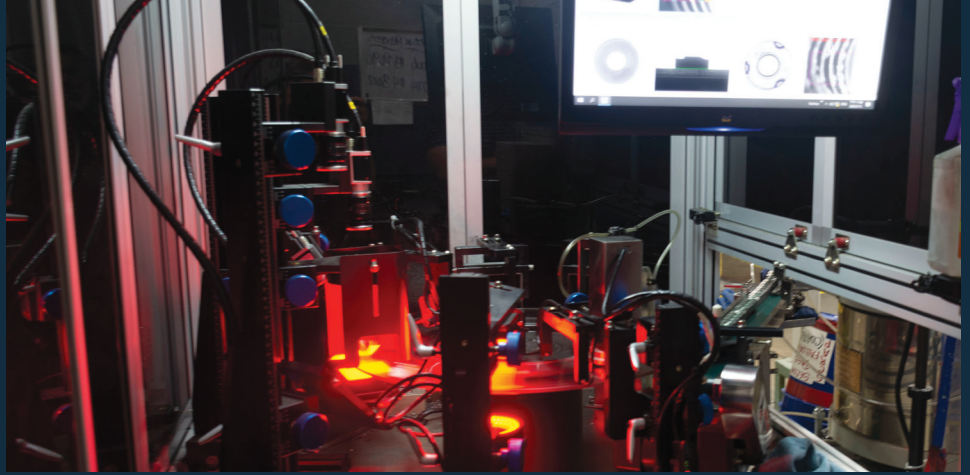

QUALITY

Decker delivers high-quality fasteners with a zero-defects goal, ensuring accuracy and precision through advanced optical measuring systems and proof-load testing. All testing is performed in our A2LA-accredited laboratory, reinforcing our commitment to excellence and strict quality standards.

CERTIFICATIONS

Decker is proud to hold several key industry certifications:

- **IATF 16949:2016**
- **ISO 14001:2015**
- **A2LA Accreditation**
- **CoC-OEM Class Markings for Weld Nuts**
